

# LOW-VOLTAGES CURRENT TRANSFORMERS

For over sixty years we have been providing you with all what you need, working in accordance with the highest standards. Every day thousands of our clients all over the world get our safe and user-friendly products. It wouldn't be possible without power and skills of our best specialists. We remember about every single detail because:

# GENERAL OVERVIEW OF CURRENT TRANSFORMERS

**CURRENT TRANSFORMER** is used for measurement of electric alternating currents. When current in a circuit (primary current) is too high to directly apply to measuring instruments, a current transformer produces a reduced current (secondary current) accurately proportional to the current in the circuit, which can be conveniently connected to measuring and recording instruments. A current transformer also isolates the measuring instruments from what may be very high voltage in the monitored circuit. Relationship between primary and secondary currents is called **rated transformation ratio**.

$$I_1 = I_2 \cdot \frac{N_2}{N_1}$$

where:  $I_1$  - primary current,  $I_2$  - secondary current,  $N_1$  - number of turns of primary winding,  $N_2$  - number of turns of secondary winding,  $N_2/N_1$  - rated transformation ratio  
Current transformers are used mainly in such a way that the cable from the measured shock or bus current passes through the main hole transformer, which is equivalent to one coil primary winding. In this case, the above equation simplifies to:

$$I_1 = I_2 \cdot N_2$$

The task is to reduce the transformer output current for currents of over 120% of measurement range, to protect against destruction of measuring devices connected to the transformer in case of surges or failures in the primary circuit.

## FEATURES:

- Wide range of accuracy classes: 0.2S, 0.2, 0.5S, 0.5, 1; 3
- Wide range of supported primary currents, the dimensions of rails, the length of casing and hole diameters.
- Multiple mounting methods, including wall mounting, DIN rail 35mm, the conductor, a current bar.
- Shields designed to seal connections.

## GENERAL SPECIFICATION

**Applicable standard:**

IEC 61869-1/2

**Case:**

10% glass filled polycarbonate, flame retardant grades classified UL 94V-0 or housing made of epoxy resin (LRC series only)

**Connection:**

Two connection on each side. M4 screws with self lifting clamp strap.

**Insulation class**

E (120°C max)

**Maximum system voltage:**

0.72 kV

**Operating frequency:**

50/60 Hz

**Rated primary rating:**

1 A...7500 A

**Rated secondary output:**

5 A or 1 A (for LCTP 3-phase current transformers only 5 A)

**Rated burden:**

1, 1.25, 1.5, 2.5, 3.75, 5, 7.5, 10, 12.5, 15, 20, 30, 45, 60, 100 VA

**Accuracy class:**

0.2, 0.2S, 0.5S – for laboratory and power measurement

0.5 – for accurate measuring

1; 3 – for general measurement, for analog meters

**Ambient temperature:**

-20°C ...+45°C

**Operating temperature:**

-10°C ...+55°C

**Storage temperature:**

-50°C...+80°C

**Thermal short circuit current (I<sub>th</sub>):**

40 x I<sub>n</sub> for wound type

**Dynamic short circuit current (I<sub>dyn</sub>):**

60 x I<sub>n</sub> for bus bar type

**Instrument security factor (FS):**

2.5xI<sub>th</sub>

2.5, 5, 10

## FEATURES:

720 V

Class  
0.2S 0.2  
0.5S 0.5  
1 3

## OUTPUTS:

5 A

1 A

## DEMAND FOR POWER MEASURING DEVICES:

CT users expect these devices fulfill two basic conditions:

- a high degree of accuracy in the nominal current,
- security functions with overloads.

In order to fulfill these stipulations it is necessary for the power of a current transformer offered to fully achieve the actual power requirements of the measurement setup. In ascertaining the actual power requirements, consideration is to be made not only of the loss of power of the appliances to be connected up, but also the losses incurred by the instrument leads.

# GENERAL OVERVIEW OF CURRENT TRANSFORMERS

Power requirements for measuring apparatus and relays:

- Analog moving-iron meters 0.7 – 1.5VA
- Rectifier current meters 0.001 – 0.250 VA
- Multi-range current meters 0.005 – 5.000 VA
- Current recorders 0.300-9.000 VA
- Bimetallic ammeters 2.5 – 3.0 VA
- Power meter 0.2 – 5.0 VA
- Power factor meter 2.0 – 6.0 VA
- Meters 0.4 – 1.0 VA
- Relays 0.2 – 6.0 VA
- Power transducers 0.5 VA
- Energy meters 2.5 VA

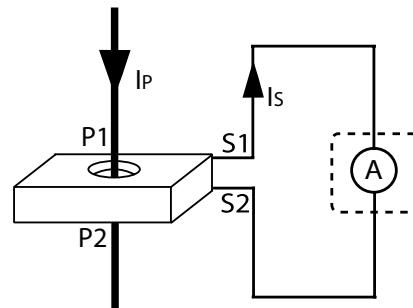

Internal losses of copper wiring:

$$P = \frac{I^2 \times 2L}{q_{CU} \times 56} \text{ [VA]}$$

Where:

I – Secondary nominal current,  
L – Distance in [m],  
q<sub>CU</sub> – wire cross-section in [mm<sup>2</sup>].

\* The custom value of the nominal power, which should be given when ordering the transformer.

**Ordering example:** Order code LCTB 623050100A55 means the transformer LCTB 62/30(50) 100/5A meeting the requirements of the class:

- kl. 0.5 2.5 VA
- kl. 1 5 VA
- kl. 3 7.5 VA

### ACCESSORIES:

DIN rail mounting base  
- for details see page 46

LCR7 230165

LCR8 295200

Ordering example: Order code LRC7 2301653200A51 means the transformer LRC7 230/165(40) 3200/5A; Class 1; power 15VA

**SUMMATION CURRENT TRANSFORMER** are designed to summarize several synchronous alternating currents of equal phase relation with any angle of phase difference. They are used to add secondary currents of several main c.t.s in order to measure with the CT only.

Current measurement in phase L1

## AN EXAMPLE OF POWER SELECTION FOR MAIN TRANSFORMERS WITH DIFFERENT TRANSMISSIONS

Main Transformer ratio:

$$\begin{array}{r}
 500/5A \\
 400/5A \\
 300/5A \\
 \hline
 \text{Total current} = 1200/5A
 \end{array}$$

Burden - 1 Ammeter

Required Active performance of the Current Transformer:

|                             |        |
|-----------------------------|--------|
| Ammeter                     | 1.5 VA |
| Measurement Conductor Loss  | 1.5 VA |
| Consumption in Summation CT | 4.0 VA |
| Total VA                    | 7.0 VA |

The individual main transformer must provide its VA share from this 7.0 VA.

1. Main transformer 500/5A  $(500/1200) \times 7 = 2.92 \text{ VA} + \text{additional losses} \approx 3.75 \text{ VA}^*$
2. Main transformer 400/5A  $(400/1200) \times 7 = 2.33 \text{ VA} + \text{additional losses} \approx 2.5 \text{ VA}^*$
3. Main transformer 300/5A  $(300/1200) \times 7 = 1.75 \text{ VA} + \text{additional losses} \approx 2.5 \text{ VA}^*$

\*The VA values of the main transformer are to be rounded up to the corresponding values in our chart.

**Note:** If using unequal main c.t.'s than ration of lowest primary main c.t. current to the highest one should not exceed 1:8.

## FEATURES:

- Available current transformers versions with 2 to 8 primary windings.
- Nickel plated secondary terminals with +/- screws.
- Multiple mounting methods, including wall mounting, DIN rail 35mm.
- Terminal protection IP10.

## GENERAL SPECIFICATION

**Applicable standard:**

IEC 61869-1/2

**Case:**

self-extinguishing plastic

**Connection:**

Two connection on each side. M4 screws with self lifting clamp strap.

**Insulation class:**

E (max 120°C)

**Maximum system voltage:**

0.72 kV

**Operating frequency:**

50/60 Hz

**Test voltage:**

3 kV, 50 Hz, 1 min

**Rated primary rating:**

(2...8) x 5A

**Rated secondary output:**

5A

**Rated burden:**

5; 10; 15; 20; 25 VA

**Accuracy class:**

0.5; 1

**Ambient temperature:**

-25°C ...+40°C

**Storage temperature:**

-50°C...+80°C

**Thermal short circuit current ( $I_{th}$ ):**

$60 \times I_n$

**Dynamic short circuit current ( $I_{dyn}$ ):**

$2.5 \times I_{th}$

**Instrument security factor (FS):**

5,10

## FEATURES:

**720 V**

**Class**  
0.5  
1

## OUTPUTS:

**5 A**

Made by **LUMEL**

We are one of leading European manufacturers of electrical devices for automation and high pressure aluminium castings. We have been on the market since 1953. We have achieved our high position on the market due to continuous development policy, competence of our employees and modern equipment for research, design and production.

LUMEL is focused on 4 main activity fields:

- production of automatic devices for measurement, conversion, control and recording, transmission and visualization of various industrial processes;
- production and machining of high pressure castings and manufacturing of moulds and tools;
- design and manufacturing of control and measuring systems,
- SMT assembly, precision engineering and production of plastics parts.

We provide comprehensive solutions for various branches of industry: power industry, chemical industry, metallurgy, food industry, light industry, automotive industry, white industry and mining.

We have been working according to: ISO 9001:2015, ISO 14001:2015.
